RE: Report
Initial Site Assessment
Chico, Butte County, California

Dear Kamie Loeser:

Pursuant to your request, Chico Environmental presents the enclosed Initial Site Assessment Report for the above-referenced properties.

We appreciate the opportunity to assist you on this project. Should you have any questions or if we may be of additional service, please contact us at (530) 899-2900.

Sincerely,
Chico Environmental

John Lane, P.G, R.E.A
Principal/Project Manager

Initial Site Assessment (ISA) Checklist

Project Information

District ____ County ____ Route ____ Post Mile _____ EA _____

Description _____

Is the project on the HW Study Minimal-Risk Projects List (HW1)? _____

Project Manager _____ phone # _____

Project Engineer _____ phone # _____

Project Screening

Attach the project location map to this checklist to show location of all known and/or potential HW sites identified.

1. Project Features: New R/W? _____ Excavation? _____ Railroad Involvement? _____

Structure demolition/modification? _____ Subsurface utility relocation? _____

2. Project Setting _____

Rural or Urban _____

Current land uses _____

Adjacent land uses _____

(industrial, light industry, commercial, agricultural, residential, etc.)

3. Check federal, State, and local environmental and health regulatory agency records as necessary, to see if any known hazardous waste site is in or near the project area. If a known site is identified, show its location on the attached map and attach additional sheets, as needed, to provide pertinent information for the proposed project.

4. Conduct Field Inspection. Date _____ Use the attached map to locate potential or known HW sites.

STORAGE STRUCTURES / PIPELINES:

Underground tanks _____ Surface tanks _____

Sumps _____ Ponds _____

Drums _____ Basins _____

Transformers _____ Landfill _____

Other _____

Initial Site Assessment (ISA) Checklist (continued)

CONTAMINATION: (spills, leaks, illegal dumping, etc.)

Surface staining _____ Oil sheen _____

Odors _____ Vegetation damage _____

Other _____

HAZARDOUS MATERIALS: (asbestos, lead, etc.)

Buildings _____ Spray-on fireproofing _____

Pipe wrap _____ Friable tile _____

Acoustical plaster _____ Serpentine _____

Paint _____ Other _____

5. Additional record search, as necessary, of subsequent land uses that could have resulted in a hazardous waste site. Use the attached map to show the location of potential hazardous waste sites.

6. Other comments and/or observations: _____

ISA Determination

Does the project have potential hazardous waste involvement? _____ If there is known or potential hazardous waste involvement, is additional ISA work needed before task orders can be prepared for the Investigation? _____ If "YES," explain; then give an estimate of additional time required: _____

A brief memo should be prepared to transmit the ISA conclusions to the Project Manager and Project Engineer.

ISA Conducted by _____ **Date** _____

 Chico Area Transit Expansion, Chico CA*

APPENDIX A

HAZARDOUS WASTE INITIAL SITE ASSESSMENT

This report summarizes the findings of an Initial Site Assessment (ISA) conducted by Chico Environmental Science and Planning for Northstar Engineering/Galloway Consulting. This ISA was conducted for a 16 acre portion of Assessors Parcel Number (APN) 039-060-125 located at 326 Huss Drive in the city of Chico, Butte County, California (**Figure 1**).

The purpose of this ISA was to review past and present land use practices, site operations and conditions, and nearby off-site land uses to evaluate the potential for soil and/or groundwater contamination of the site. This ISA was conducted at the request of Northstar Engineering/Galloway Consulting, and was performed in accordance with the American Society of Testing and Materials (ASTM) guidance presented in ASTM Standard E 1527-05, Section 40 Code of Federal Regulations Part 312.

Government Records Search

Chico Environmental reviewed information gathered from several environmental databases through Environmental Data Research (EDR) to evaluate whether activities on or near the subject property have the potential to impact environmental conditions at the subject property. EDR reviews databases compiled by federal, state, and local governmental agencies. The complete list of reviewed databases is provided in the EDR report, included in **Appendix A**. It should be noted that this information is reported as Chico Environmental received it from EDR, which in turn reports information as it is provided in various government databases. It is not possible for either Chico Environmental or EDR to verify the accuracy or completeness of information contained in these databases. However, the use of and reliance on this information is a generally accepted practice in the conduct of environmental due diligence. The databases searched and the information obtained is summarized below.

The subject property (326 Huss Drive) was listed in the databases searched by EDR as a RCRA Non-generator site.

Properties interpreted as hydraulically down-gradient or cross-gradient, and/or at an excessive distance from the subject property that in our opinion are unlikely to impact the site with hazardous materials are excluded from the following discussion. Three sites within a 1-mile radius of the project area were identified in the database reports as hydraulically up-gradient or cross-gradient from the project site.

The following list details the type and number of sites reported in the EDR report. Details for each of the sites can be found in **Appendix A**.

TABLE 1	
ENVIRONMENTAL AGENCY DATA	
Agency Database	Survey Distance
United States Environmental Protection Agency (EPA) National Priority List (NPL) for Superfund Sites	1.0 mile
U.S. EPA Comprehensive Environmental Response, Compensation and Liability Index System (CERCLIS) List	0.5 mile

HWP	1 mile

The subject property was listed in the databases searched by EDR.

Properties interpreted as hydraulically down-gradient or cross-gradient, and/or at an excessive distance from the subject property that in our opinion are unlikely to impact the site with hazardous materials are excluded from the following discussion. Three sites within a 1-mile radius of the subject property were identified in the database report.

U.S. EPA National Priorities List (NPL)

The NPL includes those sites determined by the EPA to require priority remedial action, and those sites for which "Superfund" finances have been allotted. No NPL sites are listed within a 1-mile radius of the subject property.

U.S. EPA Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) List

The CERCLIS List is a compilation by EPA of the properties or facilities which EPA has investigated or is currently investigating for a release or threatened release of hazardous substances pursuant to the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (Superfund Act). No facilities within a 1-mile radius of the subject property were listed.

U.S. EPA CERCLIS (No further remedial action planned)

The CERCLIS-NFRAP List identifies sites that have been removed from the CERCLIS List by the EPA. Following an investigation, contamination at these sites may have either been not found, not serious enough to require NPL consideration, or removed quickly without the need for the site to be placed on the NPL List. No facilities were located within a 0.5 mile radius of the subject property.

RCRA Corrective Action (CORRACTS) Treatment Storage, Disposal (TSD) List

The EPA's Corrective Action (CORRACTS) list identifies facilities which are undergoing "corrective action" relative to a release of hazardous wastes or constituents into the environment from a RCRA facility. No facilities within a 1-mile radius of the subject property were listed.

RCRA Resource Conservation and Recovery Act Index System (RCRIS) Treatment Storage, Disposal (TSD) List

The EPA's Resource Conservation and Recovery Information System (RCRIS) identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRIS Treatment, Storage, Disposal (TSD) Facilities List is a compilation by EPA of reporting facilities that generate, transport, store, treat, or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). No facilities within a 0.5-mile radius of the subject property were listed.

U.S. EPA Emergency Response Notification System (ERNS)

The ERNS List is a list compiled by EPA of the spills of potentially hazardous substances called in to the Coast Guard and other spill response centers across the U.S. Spill notifications included on this list have not necessarily been confirmed by USEPA. No facilities within a 0.5-mile radius of the subject property were listed.

U.S. EPA RCRA Generators or Notifiers List

The EPA's Resource Conservation and Recovery Act (RCRA) Program identifies and tracks hazardous waste from the point of generation to the point of disposal. The RCRA Facilities List is a compilation by EPA of reporting facilities that generate hazardous waste. One facility within a 0.25-mile radius of the subject property was listed.

The subject property was listed (ATC VANCOM).

FUDS

Formerly Used Defense Sites - The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions. No facilities within a 1-mile radius of the subject property were listed.

California Department of Toxic Substance Control – Confirmed and Suspected Contaminated Sites Report

The Confirmed and Suspected Contaminated Sites Report is a compilation of sites with confirmed or suspected contamination. No facilities within a 1-mile radius of the subject property were listed.

California Hazardous Material Incident Report System (CHMIRS)

The CHMIRS List identifies sites that have been subject to hazardous material incidents such as accidental releases or spills. No facilities were listed within a 1-mile radius of the subject property.

State CORTESE Hazardous Waste and Substance List

The CORTESE List is compiled by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites). This list identifies sites designated by these agencies. No facilities within a 0.5-mile radius of the subject property were listed.

State Proposition 65 Records (NOTIFY 65)

The NOTIFY 65 list contains notifications regarding any release which could affect drinking water and expose the public to a potential health risk. No facilities within a 1-mile radius of the subject property were listed.

Solid Waste Landfills

This list is provided by the Department of Toxic Substances Control and is a compilation of solid waste facilities currently in operation. No facilities located within a 0.5-mile radius of the subject property were listed.

California Department of Toxic Substance Control CAL-SITES

The Cal-Sites database contains potential or confirmed hazardous substance release properties. No facilities located within a 1-mile radius of the subject property were located.

California Leaking Underground Storage Tank (LUST) List

The LUST list is a compilation of sites with confirmed leaking underground storage tanks (LUSTs) that have been reported by the State Water Resources Control Board Leaking Underground Storage Tank Information System. No facilities within a 0.5-mile radius of the subject property were listed.

California Underground Storage Tanks (USTs) Registered in California State

This listing is a compilation of site names and addresses and tank information for sites with USTs registered with the State Water Resources Control Board's Hazardous Substance Storage Container Database. This database does not indicate incidents of contamination. No facilities within a 0.25-mile radius of the subject property were listed.

California Facility Inventory Database (CA FID UST)

The CA FID UST list is compiled by the State Water Resource Control Board and identifies historical listings of active and inactive storage tank locations. No facilities within a 0.25-mile radius of the subject property were listed.

California Hazardous Waste Information System (HAZNET)

The HAZNET list is compiled by the Department of Toxic Substance Control (DTSC) and identifies hazardous waste shipments from manifests. No facilities within a 0.25-mile radius of the subject property were listed as being up-gradient of the site.

State Hazardous Substance Storage Container Database (HIST UST)

The HIST UST list contains historical listings of UST sites. No facilities within a 0.25-mile radius of the subject property were listed:

Aboveground Storage Tank Database (AST)

The data in this database is provided by the State Water Resources Control Board's Hazardous Substance Storage Container Database. No facilities within a 0.25-mile radius of the subject property were listed.

Statewide Environmental Evaluation and Planning System (SWEEPS)

This underground storage tank listing was updated and maintained by a company contracted by the State Water Resources Control Board in the early 1980's. The listing is no longer updated or maintained. No facilities within a 0.25-mile radius of the subject property were listed.

SWRCY – A list of recycling facilities in California

No facilities were identified within a 0.5-mile radius of the subject site.

Toxic Pits Cleanup Act Sites Database

The Toxic Pits Cleanup Act Sites Database identifies sites suspected of containing hazardous substances where cleanup has not yet been completed. The data comes from the State Water Resources Control Board. No facilities were identified within a 1 mile radius of the subject property.

California Spills, Leaks, Investigation and Cleanup Cost Recovery (CA SLIC)

Sites in the SLIC program are generally small to medium-sized industrial sites with non-fuel contamination. Many of these sites are regulated under Site Cleanup Requirements, which are issued by the Regional Board. Site Cleanup Requirements generally mandate a time schedule for specific tasks that must be performed by the responsible party(ies) to investigate and cleanup the site. The SLIC Program is managed by the Toxics Cleanup Division. No facilities were identified within a 0.5 mile radius of the subject property.

VCP

VCP contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have requested that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC's costs. No VCP site was identified within 0.5 mile of the subject property.

DRYCLEANERS

A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial, garment pressing and cleaners' agents, linen supply, coin-operated laundries and cleaning, drycleaning plants except rugs, carpet and upholster cleaning, industrial launderers, laundry and garment services. No facilities were identified within 0.25 mile of the subject property.

ENVIROSTOR

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that

have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites. Two facilities were identified within a 1 mile radius of the subject property:

1. SFPP LP (Chico Terminal) – 2570 Hegan Lane, Chico, CA; east northeast of the project site – 0.564 miles away.
2. Valley Wide Chemical Inc. – Midway Street & Hegan Lane, Chico, CA.; east northeast of the project site – 0.774 miles away.

Other Ascertainable Records

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor. A review of the HWP list, as provided by EDR, and dated 8/09/2010 has revealed that there is one HWP site within approximately 1 mile of the target property.

1. Asbury Environmental Services – 2549 Scott Avenue, Chico, CA; northeast of the project site – 0.915 miles away.

Unmapped Sites

Nine sites were listed as unmapped sites in the database report, which are sites that have not been plotted due to lack of sufficient data regarding their exact location within the general area. It is Chico Environmental's opinion that there is a no potential for these facilities to impact subsurface conditions at the subject property.

Visual Site Survey

The visual site survey for the site was surveyed by Chico Environmental on September 7, 2011. The survey consisted of visually inspecting the project area and neighboring facilities within the project vicinity. Site photographs are included in **Appendix B**.

The site consists of a large fallow field with a newly planted field of row crops adjacent to the northwest (**Photo 1**). Huss Drive and Chico Transit Area are immediately adjacent to the project site to the east and northeast (**Photo 2**). Huss Drive and Chico Transit Area are adjacent to the project site to the east (**Photo 3**). A fallow field consisting of approximately three to five acres is located to the south of the project site (**Photo 4**). Commercial / industrial businesses are present across Huss Drive to the east (**Photo 5**). The Union Pacific railroad line is to the west along the property line (**Photo 6, 7**). A large orchard property is situated across the Union Pacific Railroad (**Photo 8**).

The site survey revealed a groundwater monitoring well next to the Huss Drive/Aztec Drive intersection (**Photo 9**). Some soil and asphalt dumping was observed on the property (**Photo 10**). The project site is fallow and full of weeds (**Photo 11**). A structure is located on the northeast property corner. The structure does not have a foundation (**Photo 12**).

Butte County Environmental Health Department Files

On September 20, 2011 Chico Environmental contacted The Butte County Environmental Health Department, which identifies facilities known to contain and or generate hazardous substances. The Butte County Environmental Health Department did not have any information pertaining to the property. 326 Huss Drive is regulated under Certified Unified Program Agency (CUPA). CUPA did not have any violations and inspections were current.

Historical Aerial Photographs

Historical aerial photographs of the site and vicinity were obtained from EDR, for the years 1941, 1947, 1952, 1962, 1972, 1984, 1993, 1998, 2005, 2006. These photos were reviewed and interpreted for indications of past site land use and/or site activities that may have involved the manufacture, generation, use, storage, and/or disposal of hazardous materials. The following observations were made:

- 1941 Hegan lane is visible to the south of the property, with the Union Pacific Railroad to the west and southwest of the project site. There are a few structures visible to the southeast across Hegan lane. Six large trees are visible on the property. Two thin, dry gullies are present to the northwest and northeast which seem to have their terminus at or near the project site. There is third thin, dry gully within the landscape to the southeast. Comanche Creek is visible northwest of the project site.
- 1947 Disking of the soil on the project site is visible in this photograph. Orchards are visible to the north, west and south of the project area. The parcel to the east is also disked. The gully northwest of the property has been redirected westwards. The gully northeast of the property appears to have been graded flat. The gully southeast of the site seems to have been graded.
- 1952 An "X" shape pattern is noticeable on the subject site. This larger scale photo reveals that the northwest and northeast gullies may still be present in the landscape on the eastern adjacent parcel.
- 1962 A large industrial warehouse is visible south of the project site. A rail spur extending from the Union Pacific line to the property is visible. The project site and the parcel to the east are now composed of row crops. One large tree has been removed from the project site. An industrial tank farm has been established to the northeast of the property.
- 1972 Little change in the landscape compared to the previous photograph. Most large trees have been removed from the parcel.
- 1984 Little change in the landscape compared to the previous photograph.
- 1993 Commercial / Industrial businesses begin developing on parcels east and north northeast of the project site. Existence of previously mentioned rail

Chico transit Area property is visible adjacent to the project site. More commercial / industrial business sites have developed to the east.

2005 A commercial / industrial business is visible to the southeast of the project site. More commercial / industrial businesses are visible to the east of the project site across Huss Drive.

2006 Little change in the landscape compared to the previous photograph. A warehouse has developed to the east of the site across Huss Drive.

Please refer to **Appendix C** for historical aerial photos.

Sanborn Fire Insurance Maps

Sanborn Fire Insurance map coverage does not include this portion of Butte County

CONCLUSIONS

Government Records

The governmental record search indicated that two plumes of contaminated groundwater may exist below the subject site; one from the Kinder Morgan tank farm and one from JM Smuckers. The contaminants of concern include volatile organic compounds (VOCs), methyl-tertiary-butyl-ether (MTBE), benzene, toluene, ethylbenzene, and xylene (BTEX), perchloroethylene (PCE), trichloroethylene (TCE), 1,1-Dichloroethene (1,1-DCE) and cis-1,2-DCE, 1,2-dichloropropane (1,2-DCP) and 1,2,3-trichloropropane (1,2,3-TCP). Additionally, Chico Environmental contacted Eric Rapport of the Regional Water Quality Control Board. Mr. Rapport informed Chico Environmental that the monitoring well located on the corner of Huss Drive and Aztec Lane had been installed by the Department of Toxic Substances Control for the purpose of monitoring the two groundwater plumes.

Visual Site Survey

No structures in the proposed project area were entered or tested for asbestos or lead based paint. Electric power poles, pole mounted transformers and road paint stripping was not observed within or adjacent to the project area. Due to the agricultural nature of the subject site and the vicinity of the rail line herbicides/pesticides VOCs, metals and aerially deposited lead may be found in subject site soils.

Additional Investigations

Historical aerial photographs were reviewed by Chico Environmental to determine prior activities and land uses within the project area. Recognized environmental conditions were not noted in the historical documents reviewed. However, due to the agricultural nature, the proximity of the site to the railroad, and the plumes of contaminated groundwater, the

likelihood for a recognized environmental condition at the subject site appears to be high. Chico Environmental recommends soil to be sampled for herbicides, pesticides, VOCs and metals. Groundwater should be sampled for MTBE, BTEX, PCE, TCE, DCE, DCP and TCP.

LIMITATIONS AND QUALIFICATIONS

The conclusions presented in this report are professional opinions based upon visual observations of the site and vicinity, and our interpretation of the available historical information and documents reviewed, as described in this report. The conclusions are intended exclusively for the purpose outlined in this report, and at the site location and project indicated. This report is intended for the sole use by Northstar Engineering/Galloway Consulting. The scope of services performed in execution of this investigation may not be appropriate to satisfy the needs of other users, and any use or reuse of this document or the findings, conclusions, or recommendations presented herein is at the sole risk of said user.

It should be recognized that this study was not intended to be a definitive investigation of potential environmental impacts at the site. Given that the scope of services for this investigation was limited, it is possible that currently unrecognized contamination may exist at the site.

Opinions and recommendations presented herein apply to the existing and reasonably foreseeable site conditions at the time of our assessment. They cannot necessarily apply to site changes of which this office is unaware and has not had the opportunity to evaluate. Changes in the conditions of this property may occur with time due to natural processes or works of man on the site or adjacent sites. Changes in applicable standards may also occur as a result of legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated, wholly or in part, by changes beyond our control.

Chico Environmental has performed this assessment under my supervision in accordance with generally accepted environmental practices and procedures, as of the date of this report. I have employed the degree of care and skill ordinarily exercised under similar circumstances by reputable environmental professionals practicing in this area. The scope of services conducted for this ISA corresponds to the American Society of Testing and Materials (ASTM) guidance presented in ASTM Standard E 1527-05, Section 40 Code of Federal Regulations Part 312. The conclusions contained within this assessment are based upon site conditions readily observed or were reasonably ascertainable and present at the time of the site inspection.

Signature of Professional Geologist – John Lane, P.G. No. 7717

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

EXECUTIVE SUMMARY

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

ENVIROSTOR: The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 06/15/2011 has revealed that there are 2 ENVIROSTOR sites within approximately 1 mile of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>
<i>SFPP LP (CHICO TERMINAL)</i> Status: Refer: Other Agency	<i>2570 HEGAN LANE</i>	<i>ENE 1/2 - 1 (0.564 mi.)</i>	<i>5</i>	<i>13</i>
<i>VALLEY WIDE CHEMICAL INC</i> Status: Refer: Other Agency	<i>MIDWAY STREET & HEGAN L</i>	<i>ENE 1/2 - 1 (0.774 mi.)</i>	<i>6</i>	<i>22</i>

ADDITIONAL ENVIRONMENTAL RECORDS

Other Ascertainable Records

HWP: Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

A review of the HWP list, as provided by EDR, and dated 08/09/2010 has revealed that there is 1 HWP site within approximately 1 mile of the target property.

Hazardous Waste Summary:

Waste code: D001
Waste name: IGNITABLE HAZARDOUS WASTES ARE THOSE WASTES WHICH HAVE A FLASHPOINT OF LESS THAN 140 DEGREES FAHRENHEIT AS DETERMINED BY A PENSKEY-MARTENS CLOSED CUP FLASH POINT TESTER. ANOTHER METHOD OF DETERMINING THE FLASH POINT OF A WASTE IS TO REVIEW THE MATERIAL SAFETY DATA SHEET, WHICH CAN BE OBTAINED FROM THE MANUFACTURER OR DISTRIBUTOR OF THE MATERIAL. LACQUER THINNER IS AN EXAMPLE OF A COMMONLY USED SOLVENT WHICH WOULD BE CONSIDERED AS IGNITABLE HAZARDOUS WASTE.

Waste code: D002
Waste name: A WASTE WHICH HAS A PH OF LESS THAN 2 OR GREATER THAN 12.5 IS CONSIDERED TO BE A CORROSIVE HAZARDOUS WASTE. SODIUM HYDROXIDE, A CAUSTIC SOLUTION WITH A HIGH PH, IS OFTEN USED BY INDUSTRIES TO CLEAN OR DEGREASE PARTS. HYDROCHLORIC ACID, A SOLUTION WITH A LOW PH, IS USED BY MANY INDUSTRIES TO CLEAN METAL PARTS PRIOR TO PAINTING. WHEN THESE CAUSTIC OR ACID SOLUTIONS BECOME CONTAMINATED AND MUST BE DISPOSED, THE WASTE WOULD BE A CORROSIVE HAZARDOUS WASTE.

Waste code: D008
Waste name: LEAD

Violation Status: No violations found

FINDS:

Registry ID: 110014377520

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

CA WDS:

Facility ID: 5R 04I011075
Facility Type: Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.

Agency Type: Private
SIC Code: 4119
SIC Code 2: 4131
Primary Waste: Stormwater Runoff
Primary Waste Type: Inert/Influent or Solid Wastes that do not contain soluble pollutants or organic wastes and have little adverse impact on water quality. Such wastes could cause turbidity and siltation. Uncontaminated soils, rubble and concrete are examples of this category.
Secondary Waste: Not reported
Secondary Waste Type: Not reported
Design Flow: 0
Baseline Flow: 0
Reclamation: Not reported
POTW: Not reported
Treat To Water: Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.

Assembly District: 3
Senate District: 4
Public Information Officer: Not reported
Facility Status: Asbury Environmental Services, Chico Facility is currently operating a used oil transfer and storage facility under a Standardized Hazardous Waste Facility Permit which was initially issued in 1997 to Evergreen Oil Company. On January 3, 2002, Evergreen Oil Company filed a permit modification with DTSC to transfer the Standardized Permit to Asbury Environmental Services. Prior to 1922, the land was vacant. In 1922, Puritz Oil operated a gasoline and diesel bulk storage facility consisting of above ground storage tanks, truck parking area, and warehouse. In August 1989, Northgate Petroleum Company acquired the property from Puritz Oil. Northgate Petroleum Company currently operates a large petroleum distribution facility which contains a fueling station for gasoline and diesel fuel, above ground storage tanks for bulk storage, truck parking, and a small waste transfer area. In 1991, Evergreen Oil Company leased from the Northgate Petroleum Company an area in the southwest corner of the Northgate property and began operating a used oil transfer and applied for a Standardized Hazardous Waste Facility Permit. The permit was issued in December 1997 and expired December 2007. Asbury has submitted a timely renewal application for the Standardized Permit and therefore continues to operate under the expired permit.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 03/31/2011	Source: EPA
Date Data Arrived at EDR: 04/13/2011	Telephone: N/A
Date Made Active in Reports: 06/14/2011	Last EDR Contact: 07/12/2011
Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 03/31/2011	Source: EPA

Number of Days to Update: 62	Next Scheduled EDR Contact: 10/24/2011
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 02/25/2011	Source: EPA
Date Data Arrived at EDR: 03/01/2011	Telephone: 703-412-9810

	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/25/2011	Source: EPA

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 06/15/2011
Date Data Arrived at EDR: 07/07/2011

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database

The Department of Toxic Substances Control's (DTSC's) Site Mitigation and Brownfields Reuse Program's (SMBRP's) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

	Data Release Frequency: Varies

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Date of Government Version: 02/02/2011	Source: Drug Enforcement Administration
Date Data Arrived at EDR: 03/17/2011	Telephone: 202-307-1000

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

DEED: Deed Restriction Listing

Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program (SMBRP) list includes sites cleaned up under the program's oversight and generally does not include current or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land use restriction at the local county recorder's office. The land use restrictions on this list were required by the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed restriction, or a land use restriction that binds current and future owners.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

	Data Release Frequency: Quarterly

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 04/14/2010	Source: EPA
Date Data Arrived at EDR: 04/16/2010	Telephone: (415) 947-8000
Date Made Active in Reports: 05/27/2010	Last EDR Contact: 06/14/2011
Number of Days to Update: 41	Next Scheduled EDR Contact: 09/26/2011
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

HAZNET: Facility and Manifest Data

Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

Next Scheduled EDR Contact: 10/03/2011
Data Release Frequency: Annually

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: Rextag Strategies Corp.
Telephone: (281) 769-2247

U.S. Electric Transmission and Power Plants Systems Digital GIS Data

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Daycare Centers: Licensed Facilities

Source: Department of Social Services

Telephone: 916-657-4041

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

11-028 HUSS DR.
326 HUSS DRIVE
CHICO, CA 95928

TARGET PROPERTY COORDINATES

Latitude (North):	39.70430 - 39° 42' 15.5"
Longitude (West):	121.8225 - 121° 49' 21.0"
Universal Tranverse Mercator:	Zone 10
UTM X (Meters):	600947.2
UTM Y (Meters):	4395391.5
Elevation:	191 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	39121-F7 CHICO, CA
Most Recent Revision:	1978

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General SW

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> BUTTE, CA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	06007C - FEMA DFIRM Flood data
Additional Panels in search area:	Not Reported

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> CHICO	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data:*

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: BRENTWOOD

Soil Surface Texture: clay loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: HIGH

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	18 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 0.60 Min: 0.20	Max: 8.40 Min: 6.10
2	18 inches	50 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), Lean Clay Soils.	Max: 0.60 Min: 0.20	Max: 8.40 Min: 6.10
3	50 inches	60 inches	clay loam	Silt-Clay Materials (more than 35 pct. passing No. 200), Clayey Soils.	FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt.	Max: 0.60 Min: 0.20	Max: 8.40 Min: 7.90

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: loam
clay
sandy loam
gravelly - loam

Surficial Soil Types: loam
clay
sandy loam
gravelly - loam

Shallow Soil Types: clay
gravelly - sandy clay loam

Deeper Soil Types: stratified
indurated
loam
clay

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2011 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Health Services

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations

Source: Department of Conservation

Telephone: 916-323-1779

Oil and Gas well locations in the state.

RADON

State Database: CA Radon

Source: Department of Health Services

Telephone: 916-324-2208

Radon Database for California

Area Radon Information

Source: USGS

Telephone: 703-356-4020

The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA

Telephone: 703-356-4020

Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

APPENDIX B

Photo 1: The site consists of a large fallow field with a newly planted field of row crops adjacent to the northwest.

Photo 2: Huss Drive and Chico Transit Area are immediately adjacent to the project site to the east and northeast.

Photo 3: Huss Drive and Chico Transit Area are adjacent to the project site to the east.

Photo 4: A fallow field consisting of approximately three to five acres is located to the south.

Photo 5: Commercial / industrial businesses are present across Huss Drive to the east.

Photo 6: The Union Pacific railroad line is located to the west along the property line.

Photo 7: The Union Pacific railroad line is to the west along the property line.

Photo 8: A large orchard property is situated across the Union Pacific Railroad.

Photo 9: The site survey revealed a groundwater monitoring well next to the Huss Drive /Aztec Drive intersection.

Photo 10: Some soil and asphalt dumping was observed on the property.

Photo 11: The subject site is fallow and full of weeds.

Photo 12: A structure without a foundation within the project area was observed.

www.edrnet.com

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

Please contact EDR at 1-800-352-0050
with any questions or comments.

Disclaimer - Copyright and Trademark Notice

This Report contains certain information obtained from a variety of public and other sources reasonably available to Environmental Data Resources, Inc. It cannot be concluded from this Report that coverage information for the target and surrounding properties does not exist from other sources. **NO WARRANTY EXPRESSED OR IMPLIED, IS MADE WHATSOEVER IN CONNECTION WITH THIS REPORT.
